

WORLD RANKING LIST in HOT AIR BALLOONING

of the Commission International Aerostatique (CIA) within the Federation Aeronautique Internationale (FAI)

calculated for August 2004

The World Ranking List was first established in 2000. Its purpose is to show a ranking of the top hot air balloon pilots of the world. The list is established by a calculation formula that includes the results of the World Championships, the World Air Games and to minor effect the competitor's national ranking position. The list is updated whenever new results of the World Championships or the World Air Games are available.

This World Ranking List is not to be used for invitational purposes! The intention is to provide a performance comparison among pilots of the world. The calculation formula of this Ranking List is to be proven over a series of years and might be adapted.

Nota Bene: The National Aeroclubs can nominate any number of competing pilots for this list, so taking the quota (or percentage) of one nations pilots in the World Ranking List for any comparison could give a false impression of the performance of these nations pilots. In other words one could not deduct from this list that eg. Japan has the most best pilots placed under rank 100.

A service by the Competitors Subcommittee of the CIA / FAI. Detailed explanation is available on request.

The World Ranking List was first established in 2000. Its purpose is to show a ranking of the top hot air balloon pilots of the world. The list is established by a calculation formula that includes the results of the World Championships, the World Air Games and to minor effect the competitor's national ranking position. The list is updated whenever new results of the World Championships or the World Air Games are available.

This World Ranking List is not to be used for invitational purposes! The intention is to provide a performance comparison among pilots of the world. The calculation formula of this Ranking List is to be proven over a series of years and might be adapted.

Nota Bene: The National Aeroclubs can nominate any number of competing pilots for this list, so taking the quota (or percentage) of one nations pilots in the World Ranking List for any comparison could give a false impression of the performance of these nations pilots. In other words one could not deduct from this list that eg. Japan has the most best pilots placed under rank 100.

A service by the Competitors Subcommittee of the CIA / FAI. Detailed explanation is available on request.
